

Welcome to a world where you are in complete control of all your global shipping information. Introducing Vanguard's new, state-of-the-art interactive web portal, which gives you instant access to ...

**any data, any time,
anywhere, in any format**

www.VLS-Global.com

With Vanguard's **NEW** interactive web-based technology, we can send you...

**...any data, any time,
anywhere, in any format.**

Imagine, information at your fingertips at any time – even when our customer service centers are closed (like 3am) – at any location (like your home office) – and in any format (like a PDF you can e-mail to your customers). All of your shipment information will be centralized, organized and accessible instantly. And while our customers tell us they love our customer service representatives, we know you'll love the flexibility of our new web-based service.

This is what makes our system truly and measurably unique...

- ❖ The amount of data available – we have a larger global network than any other provider – covering all points worldwide, including: Asia, South America, the Mediterranean, the Middle East, North America, Central America, the Caribbean, the Indian Subcontinent, Europe, Africa, and the entire South Pacific region.
- ❖ The quality of our data is second to none because it is generated directly from our system, in our offices – nothing is done manually. We know that clean, fast and accurate data is vital to maintaining and improving your own customer relationships.
- ❖ Our new web site provides a single point of entry for both the information related to shipment status, as well as all copies of associated documents. This includes:
 - Booking confirmations
 - Warehouse receipts
 - Trucker's bill
 - Bills of lading
 - Commercial and packing documents
 - Hazardous documentation

Global Freight Solutions™

Web-based services...

Global Track & Trace

You can now track and trace any shipment – including origin and destination milestones – from any point to any point using our new global system. It gives you the unique and real-time ability to:

- ❖ Specify up to 90 days of data viewing (the default is 30).
- ❖ Control access rights for operators (based on user login).
- ❖ Search/filter by container, house or sub bill of lading, booking, consignee reference number, shipper reference number, forwarder reference number, country of origin, country of destination, city of origin, or city of destination by branch, region or globally.
- ❖ E-mail results of any search session to any contact in your network.
- ❖ Download the results of a search session in Excel.
- ❖ Sort results set by column heading, which displays your: booking ID number, booking date, receiving location, current location, vessel voyage number, port of discharge ETA, final destination, hold status, dimensions/weight, Shipper Letter of Instruction, and much more.
- ❖ View all U.S. origin documents assigned to a booking.
- ❖ Link from the specific booking to the Vanguard destination (CFS) milestone data (including IPI).
- ❖ Download or e-mail Shipper Letter of Instruction.
- ❖ And much more!

Global Sailing Schedules

Using our highly interactive and customizable global sailing schedules, you can find a schedule for any location serviced within our worldwide agency network. Our site will show you all origins and destinations, including sailing dates, transit times and cut-off requirements. Some of the other advantages include:

- ❖ Multiple search and filter options for all of our sailing schedules, including region-to-region or point-to-point.
- ❖ The ability to download filtered, up-to-the minute sailing schedules in multiple formats – for maximum flexibility.

Rapid Bookings

With our real-time booking feature, you can create a booking in seconds. You can also attach all of the necessary documentation and book any type of shipment from multiple commodities to hazardous materials. Some of the other advantages include:

- ❖ Receive a live booking number, instantly, since the portal is linked directly to our system.
- ❖ A booking template for pattern shipments to save you time.
- ❖ User-profile driven defaults.
- ❖ The ability to upload documents and attach them to a booking.
- ❖ Direct links to our global sailing schedule.
- ❖ Select by origin, destination or booking office.
- ❖ And a major upgrade from our previous version allows for faster navigation and fewer clicks to make a booking.

Status Mate

This feature gives you the unique ability to automate our track & trace feature by setting the day, time and data elements you would like to receive on an on-going basis. In other words, set your own report functionality and define your own data queries. For example, you can specify that every Tuesday at 3am you need all of your booking confirmations or cargo availability status. You can request to receive as much information, or as little, as you would like to see.

Instant Documentation

With our new system, you can view all incoming or outgoing documents on file instantly! In fact, all incoming and outgoing documentation, including booking confirmation, documentation receipt, truckers' bills, bills of lading, commercial invoice and hazardous documentation are available for viewing and printing. Some of the advantages include...

- Less paperwork
- No lost originals
- Automatic release of cargo at destination
- Changes to bills of lading are real-time
- No need to send documents by courier to the destination

Contact your sales person or register for all of these great online services today at: www.VLS-Global.com.
